The greatest science

Vijay Varma^{1,*}

¹ Max Planck Institute for Gravitational Physics (Albert Einstein Institute), D-14476 Potsdam, Germany (Dated: October 11, 2022)

I scienced something, so now you get to read it.

I. INTRODUCTION

I done did it. Some other people that done'd similar things: [1].

II. METHODS

Here's how I done'd it.

Figure 1. What happened to Schrodinger's cat?

III. RESULTS

Here's what I found after I done'd it. And Maxwell said:

$$dF = 0, (1)$$

$$d_{\star}F = \mu_0 J. \tag{2}$$

and then there was light.

IV. CONCLUSION

Here's what you should learn now that I done'd it.

ACKNOWLEDGMENTS

We thank Bob Loblaw for useful discussions. V.V acknowledges support from the European Union's Horizon 2020 research and innovation program under the Marie Skłodowska-Curie grant agreement No. 896869. This material is based upon work supported by NSF's LIGO Laboratory which is a major facility fully funded by the NSF.
